

GARBIN' THE STOUT WOMAN

Surplice Lines Decrease Bulk

*Full Skirt Held
Close to Hips*

The Pointed Tunic

Reducing Lines in This Suit

A NEW garment for the stout woman is always a problem. The stout woman wishes to be in fashion, and yet not one whit does she wish to increase her size. This is, of course, as it should be, if she would be well dressed. The garments pictured all show some advantageous point that aids in accomplishing the stout woman's desire.

Now that full skirts are the rage, the stout woman is, of course, just as desirous of wearing them as is her slender sister. Consequently, a way must be devised in which this fullness can be attained without a springing out of the fullness at the waist line to enlarge the hips and abdomen to an unsightly extent. Such a way is found in the rows of shirring which form a yoke in this belted-gray gown of pussy-willow taffeta. The shirring is upon cords, and the fit of the skirt is what a modiste would term as "easy." To make such a frock too tight would be to defeat one's end, that of preventing the fullness from springing out and breaking the straight lines, so desirable for the stout woman. The surplice bodice is also excellent in its reducing lines. A stout woman should remember that a defined armhole is necessary for her. She may wear a kimono under-

blouse, but a sleeveless overblouse is necessary to emphasize the armhole in that case.

The pointed tunic is another clever device for decreasing size. If the wearer is very stout, the tucks shown upon the tunic of the black evening gown may be omitted or lessened in number. The stout woman should never wear a tunic unless it has center and back points duly emphasized. The very stout woman must also draw the shoulders of this gown further up toward the neck, so that the V is less broad and is lengthened, at least in effect. For the extremely stout woman take some of the fullness from the sleeves. The merely plump woman will, of course, wish to show a goodly portion of her, in all probability, beautiful neck, and may wear the broad-shouldered V shown. Shirring confines the rather full underskirt at the bottom, so that an elusion of width is there obviated.

It would be impossible to improve upon the lines of the black-and-white pinstripe walking suit. The jacket is ideal for the woman who has a bit too much flesh. While the coat is boxed, there is just the faintest suggestion (almost imperceptible) of a curve at the waist line. The sleeves are close, but comfortable, and the skirt is of excellent proportions, both jacket and

skirt forming an almost unbroken line from shoulder to skirt hem. The extremely stout woman may dispense with the roll striped collar altogether or reduce its size and change the material to a plain color to match the suit. This model may be made in any dark color. Dark clothing always makes for slenderness.

The bust line is successfully diminished by the crossed surplice continuing into a girdle, and thus eliminating the need for a defined girdle, which latter emphasizes a woman's plumpness. This draped bodice girdle must be neither too tight nor too loose to obtain the best results. The skirt may be made with or without the bands of material about the skirt. The large woman who wishes to diminish her height as well as her breadth will do well to retain the bands. In the model picture, silk-striped chiffon is used for the lower part of the skirt and plain silk for the upper part. The silk may be continued all the way down if the stripes are not desired. A chiffon underblouse is worn. The overblouse is of silk matching that used in the skirt. Subdued violet is a safe color for the stout woman. Actual purple should be avoided, as should any other conspicuous shade.

CITY BLED BY DAYS STEWART

Called Upon to Pay \$7 a Month Garage Charges On All Its Cars.

NEED \$200,000

May Submit a By-law to the People or Pass It Themselves.

There was considerable discussion this morning at the meeting of the Hydro Board on the matter of the storage rental charged the Hydro Commission by the city for the cars. The board was informed that the Hydro Commission averages about \$7 per month. Mr. Stewart contended that this was a great deal too much. The Mayor, however, contended that this was a very small sum. He said that the city would not take this into the matter. The Mayor said that the city would not take this into the matter. The Mayor said that the city would not take this into the matter.

KEEPS HIS WIFE OR FOR MR. KITCHEN

Better Half Said He Had Been Sporting An Auto in the Queen City.

Wellington Murray Fined Because He Did Not Properly Provide For Them.

For the first time in the Hamilton police court annals a man was today fined under the Children's Protection Act, as well as having his wife taken away from him. Wellington Murray and wife were the accused, and Inspector James Finch was the complainant.

The court found that Murray was neglecting his wife and children, and that he was not providing properly for them.

The court found that Murray was neglecting his wife and children, and that he was not providing properly for them.

BRITONS ARE AWAITING FURTHER AIR ATTACKS

(Continued from Page 1.)

With news of the resumption of activity by the allied fleet off the Dardanelles, comes a report that the Dardanelles Commission is now engaged in a possible modification of the present position.

The British Colonial Office has issued an official report claiming victory for the landing British expedition force over the Turkish in Mesopotamia.

The western front signs are growing that the Germans may anticipate the long-protracted general offensive, which has been expected for some time, may be postponed to the status of mid-winter operations.

THE FRENCH REPORT.

Paris, April 17, 17. London, 17. The report on the progress of hostilities issued this afternoon by the French War Office contains nothing that was not set forth in the communications from the front.

GERMAN STATEMENT.

Berlin, April 17.—(By wireless.) The statement to-day from army headquarters is as follows: French attacks near Vimy were repulsed.

East of Ypres the British yesterday used gas and bombs, which developed an amphibious attack.

On the south slope of Lorette German units of support attack yards and fifty yards were lost.

On the north slope of Lorette a group of French fortifications was stormed. A French counter-attack was repulsed.

The Germans conquered a French position northeast of Ypres, in the morning. They captured a number of its dismounted guns.

A French airship destroyed a window in the German lines near Ypres.

On the eastern front the situation is unchanged.

It has been running around with other officers of the old army.

Benjamin Kitchener, of London, was charged with the duty of looking after the children of the soldiers.

Spring Trade and Flood Damper Work.—The London and North Western Railway to-day to consider the case of the Kewley. The striking of the steamer without warning has aroused the most widespread indignation in the district, and the railway company are now engaged in the most strenuous work to prevent the recurrence of such a disaster.

London, April 16.—Although a thaw has set in, the weather is still so cold that the spring trade is not yet well advanced. The railway companies are now engaged in the most strenuous work to prevent the recurrence of such a disaster.

He admitted that he had no intention of extending his mission to different parts of the country.

CRIMINOUS INSINUATION.

He said that a German newspaper has set in on the Carpathian mountains and the roads have been turned into mud and districts are inundated by swollen streams so that a German advance is impossible. The paper says there is no doubt that a German advance was guilty, and the question is asked whether the British are the cause of the trouble.

Home Chancery thought for a moment it is impossible to have a secret file if there is treachery, jealousy and envy in the heart.

Nobody, of the German army, in shooting and killing in a trade mission, is responsible for the situation. It is a matter of the extent of the power, and the attack on the Dardanelles has caused all the world to recognize the fact that the change is at hand. It is believed a British fleet, bombarded Irish and Hungarian (in Asia Minor, on the Black Sea).

Dardanelles fortifications from the entrance.

It is believed a British fleet, bombarded Irish and Hungarian (in Asia Minor, on the Black Sea).

BIBLE SOCIETY

has taken further heights in the mountain ranges and repulsed attacks in the vicinity of Itosaki and also in the direction of the Bity, where the Japanese have been recently driven back to Germany.

One reason given for the submarine attacks was the fact that the Japanese were not allowed to land troops in the Bity.

At the request of Great Britain the American Embassy conveyed to the Japanese Government the following statement: "The United States Government is deeply concerned at the reports of the Japanese Government that the Japanese are planning to attack the United States Navy in the Bity, which will facilitate the change. The Cabinet of Berlin and Vienna are deeply alarmed, and the Japanese are being urged to compromise disputes in the area of the Bity."

An official statement issued Friday by the French Ministry of Marine said: "The French Navy is deeply concerned at the reports of the Japanese Government that the Japanese are planning to attack the United States Navy in the Bity, which will facilitate the change. The Cabinet of Berlin and Vienna are deeply alarmed, and the Japanese are being urged to compromise disputes in the area of the Bity."

Thursday morning a French battleship destroyed the railway bridge at the Bity, which was the only line of communication between the Japanese and the United States.

Meeting Next Thursday

The annual public meeting of the Middle Eastern branch, will be held at First Methodist church, at five hundred Bojones were to cross to England Wednesday night en masse under the leadership of the king's confessor, who had been told by the effect that Hadley had promised to give him the crown of the Holy Land. The Bulgarian Government is determined not to allow its subjects to be taken to the east without their consent, and did not know because he was not there. He said that it was impossible to go to the east in such a manner, it is

Brooklyn Won Third Game From New York-- Chicago Beat Cardinals

Tie--Washington Beat Yankees.

New York, April 18.—Brooklyn turned the tables on the New York Nationals, taking the last game of the series by a score of 5 to 2. Appleton, a recruit member of the Brooklyn, pitched his first game. He was aided by New York to six hits. Perritt, the former St. Louis pitcher, was on the mound for McGraw's team and went out until the fourth inning when he was scored tied. Wheat hit a home run. Two other runs followed from Philadelphia and Boston. Flinn was stopped owing to darkness at the end of the ninth inning. In addition to the score with New York, the Nationals scored 10 runs in the seventh inning, obtaining made a double and a single, which were scored on a sacrifice. The Nationals were two runs. The early innings were marked by a scoreless tie. The Nationals fired the first shot of the season, but the first fire of the victors' team off the field for yelling from the benches.

THE FISH HAWK'S LOCKET

"He was fishing from the river bank, with a long cane fishpole, and the blue

[illegible]

"I was quite startled at this sudden unexpected deliverance on the part

"I am always glad that I remember just what I was like when I was a boy," says the discoverer myself. I should have put it on record before, I suppose, but I have been a little slipshod lately. There ain't much to put on record, though, and I don't want to get into any of the citizen's wife into the river, said and never appeared again. The fish was a small one, but it had swallowed the kitten, and the simple fact was that the kitten was dead and the lock in the nest of a fish hawk was explained by the citizen as a simple matter of fact. The fish was swimming down and caught the kitten, and the kitten was a young one, one of which had in some way got the ribbon over its head as I said.

"I don't know how the man knew all this, but to asked me to please

"All there was about my discover-

ing that fish have arms of most careless habit in building their nests, and, as I was not a fish, I was not to be told, was that one day I was out with my gun to kill a pesifumous little red snapper.

"I noticed, before I shot, that a few of the fish were swimming together on that flab, haphazard-like, just as if they had fallen there or were swimming in the current. When I fired, though, and I didn't fire to kill, I saw that the fish were in common in that jumbled bunch of sticks, and down toward the ground of the bottom, rather than swimming in the red squarer.

"It's a Good Letter. After All.

Some one has advanced the opinion that the word 'squarer' is a misspelled name letter in the English alphabet because the word 'square' is spelled with the red squarer. — New York Sun.

plunked down at my feet a couple of the oddest looking little nestlings I ever saw. They were as big as

pleas.

"When their hooked backs I would have known they were young hawks, but I wouldn't have known they were fish hawks, if the skeleton of what must have been a tremendous big fish hadn't come tumbling to the ground with them. The fall was terrible for the birds."

"There was a fish hawk's nest, we hit it" said I. "Well, I'm delighted to make the discovery, because now I can settle the question of whether or not where fish hawks build their nests; is the beginning of existence, the completion of it, or the end of it. Without it there would be no nest, and without a nest there would be no hawks. Makes life perfect, and without it there could be no culture, devotion, beauty—fourth estate."

Smoke from a lamp or gas often soiled a ceiling in any particular room. It is useful to know that soiled ceilings can be cleaned with a solution of ammonia. The ammonia is considered less conspicuous if rubbed over with dry whiting.

AUSTRALIAN-BUILT BRIDGE IN EGYPT

**SPADE LOOMS LARGE
IN MODERN WARFARE**

**Trench Fighting Not Spectacular But Arduous and Deadly—Like
Moles the Armies Burrow Their Way Through the Earth**

The armies fight like moles in France and Flanders. No more is the advance made with the blare of bands—as often the Germans boldly did, earlier in the war—nor even at the trumpet call, "To the charge!" No more the hurrah and rush of a mob of men, all gallantly hurling themselves full in the face of the enemy.

This style of combat conclusively proves that the day of massive fortifications is over. Belgium's last, worst forts of steel are now being blackened piles of riven metal—charnel houses for thousands of bodies. And many of France's forts are in like condition.

Even permanent field fortifications are of no use, beyond holding the enemy until such a time as the re-

A military swing bridge is course of construction by the 3rd Field Company of Engineers, Australian contingent, spanning the irrigation canal about a mile from the great camp at the pyramids.

<h3>THE WAR IN AFRICA</h3> <p>Desert Fighting in Waterless Desert—A Narrow Escape</p> <p>How an attack on the enemy's position in the Namanga district had to be given up because of the lack of water, and how a narrow escape was effected from a trap, is described in an extract from a letter written by an officer in the East African Mounted Rifles, who was in the thick of the action. It is difficult and the letter is full of interest.</p>	<h3>CHEERFUL GHURKAS</h3> <p>One Man Blinded But Still Makes Fun For Wounded Comrades</p> <p>Blind though he is, Gunda Singh, a young Ghurka now lying with the shrapnel wounds at Netley Hospital, is not being daunted. Indeed, in the words of Nurse Ethel Naeve, he is the life of his ward. "He is a very cheerful fellow," she says, "and always cheerful and gay. 'Somebody's got to be the laughing stock of the camp,' he says. 'I'm the laughing stock of the camp.'"</p>

[illegible][illegible]

THE WAR IN AFRICA

Desperate Fighting in Waterloo Desert—A. H. NEWELL

How an attack on the Niamanga district had to be given up because of lack of food and ammunition is the following extract from a letter written by an officer in the Black African Mounted Rifles, who is now in the German concentration camp. The letter is in French.

Two days ago we attacked a very strong hill position of the enemy. We were on the left and had our guns in position by daylight; we fought from daylight till dark and then had to retreat because we could not get water and the men were in a bad way with thirst, but we got our guns away in good order, and then had to retire three miles to the nearest bush. Our casualties were fifty-two killed and wounded, and the enemy lost 150 dead. We don't know how the wounded were taken care of, but as far as we know, we were not taken care of at all. We were on top of a bare ridge without a bit of cover.

We must have been martyred for the because I had a marvelous escape. Lying down in the long line on the left of the ridge, I felt struck me half over the heart, boring a hole into my chest. I could not get up, then turned and placing my skin in two or three places across my chest, I crawled to the water. My last rest on the stomach, and came out through my wrist. I was at the water at first, but found I was only slightly bruised and cut over the wrist. I was at the water at first, but found I was only slightly bruised and cut over the wrist. I was at the water at first, but found I was only slightly bruised and cut over the wrist.

The Germans are aware that their machine guns are armed with sawed bayonets, and they use not only machine guns, but also rifles. They don't seem to understand the meaning of fair play or have any civilian scruples. They are not afraid to shoot out of their doctors' den in a trench with the head and neck of a man in the mind of a cowardly beast, and 150 more in his hands. If now we will just kill and give no quarter to the British. We had two hundreds of French with us—they fought beautifully all day. I will send you the bullet that saved my life, but now I wear it as a memento on my shirt which was a straw.

RARE RELIC AT ARRAS

Devastated Arras possesses an ancient clock, Notre Dame de la Vierge, which remained unharmed despite the terrific bombardment, and which contains a unique relic that is nearly 1,000 years old. The relic is known as the holy candle. It is guarded in a richly jeweled silver casket, made in the order of a carpenter in the town of Baudmont and owner of Arras, and a curious history is attached to it. Legend says that in May, 1105, the virgin appeared during the night to two ministers of a terrible desolated Arras at that time, and the Virgin gave the two ministers a candle which she had taken from the shrine of the Virgin Mary, and which she had taken from the shrine of the Virgin Mary, and which she had taken from the shrine of the Virgin Mary.

It is a most interesting relic, and it is the first relic of the inhabitants of Arras that has been saved from their destruction.

How a Good Daring Aviator

Lieutenant C. H. Hucks, of the Royal Flying Corps, who, whilst scouting in France recently, had the honor of being the first to fly over the German lines, has been awarded a medal for his services. He was the first to fly over the German lines, and he was the first to fly over the German lines, and he was the first to fly over the German lines.

International Congress To Prevent Future Wars

Dr. H. Wells has contributed to the discussion as to what will happen after the war. He is of opinion that unless some means can be found to prevent such another war, the world will be a very different place. He is of opinion that unless some means can be found to prevent such another war, the world will be a very different place. He is of opinion that unless some means can be found to prevent such another war, the world will be a very different place.

CHEERFUL GHURKAS

One Man Blinded But Still Makes Fun For Wounded Comrades

Blind though he is, Gindar Singh, a young Ghurka now lying with terrible lacerations on his right hip, is not at all depressed. He is a cheerful and brave soldier, and he is a cheerful and brave soldier, and he is a cheerful and brave soldier.

SIGNALING METHODS

Three Main Systems Used in Daylight According to Distance and Light

Signalling is one of the most elementary of all the different kinds of telephony. It is signalling by just the position of the arms, either by hand or by machine. It is signalling by just the position of the arms, either by hand or by machine. It is signalling by just the position of the arms, either by hand or by machine.
